

Anti-His Tag Mouse Monoclonal Antibody (5C3), AbFluor™ 350 Conjugated

Cat #: A02050A350

Size: 100µl

Product Information

| | | | |
|---|--|---|---|
| | Product Name: Anti-His Tag Mouse Monoclonal Antibody (5C3), AbFluor™ 350 Conjugated | | |
| | Applications: IF | | Isotype: Mouse IgG |
| | Reactivity: All Species Expected | | |
| REF | Catalog Number: A02050A350 | LOT | Lot Number: Refer to product label |
| | Formulation: Liquid | | Concentration: 1 mg/ml |
|  | Storage: Store at -20°C protected from light. Avoid repeated freeze / thaw cycles. |  | Note: Contain sodium azide. |

Background: A polyhistidine-tag is an amino acid motif in proteins that consists of at least five histidine (His) residues, often at the N- or C-terminus of the protein. It is also known as hexa histidine-tag, 6xHis-tag, and by the trademarked name His-tag. Polyhistidine-tags are often used for affinity purification of polyhistidine-tagged recombinant proteins expressed in Escherichia coli and other prokaryotic expression systems.

Application Notes: Optimal working dilutions should be determined experimentally by the investigator. Suggested starting dilutions are as follows: IF (1:1000).

Storage Buffer: Liquid in PBS, pH 7.4, containing 0.02% Sodium Azide as preservative and 50% Glycerol.

Storage Instructions: Stable for one year at -20°C from date of shipment. For maximum recovery of product, centrifuge the original vial after thawing and prior to removing the cap. Aliquot to avoid repeated freezing and thawing. Store in the dark.

Fig. AbFluor™ 350 ($\lambda_{EX}/\lambda_{Em}$: 347/448 nm) is a bright UV-excitable blue fluorescent dye which is super alternative to AMCA, Dylight 350 and Alexa Fluor 350.
