

## GR (phospho Ser211) Polyclonal Antibody

Cat #: ABP50473

Size: 30µl /100µl /200µl

## **Product Information**

Product Name: GR (phospho Ser211) Polyclonal Antibody		
Applications: WB , IHC-P, ELISA		Isotype: Rabbit IgG
Reactivity: Human, Mouse, Rat		
Catalog Number: ABP50473	LOT	Lot Number: Refer to product label
Formulation: Liquid		Concentration: 1 mg/ml
<b>Storage:</b> Store at -20°C. Avoid repeated freeze / thaw cycles.	$\triangle$	Note: Contain sodium azide.
	Applications: WB , IHC-P, ELISA Reactivity: Human, Mouse, Rat Catalog Number: ABP50473 Formulation: Liquid	Applications: WB , IHC-P, ELISA   Reactivity: Human, Mouse, Rat   Catalog Number: ABP50473   LoT   Formulation: Liquid   Storage: Store at -20°C. Avoid repeated

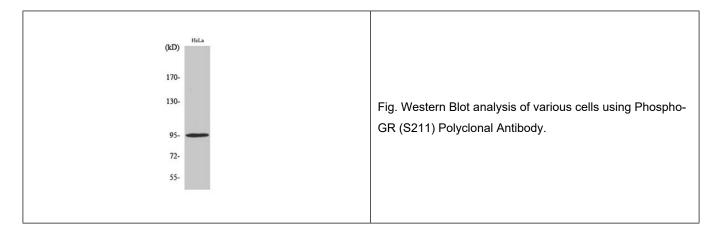

**Background:** NR3C1 encodes glucocorticoid receptor (nuclear receptor subfamily 3 group C member 1), which can function both as a transcription factor that binds to glucocorticoid response elements in the promoters of glucocorticoid responsive genes to activate their transcription, and as a regulator of other transcription factors. This receptor is typically found in the cytoplasm, but upon ligand binding, is transported into the nucleus. It is involved in inflammatory responses, cellular proliferation, and differentiation in target tissues. Mutations in this gene are associated with generalized glucocorticoid resistance. Alternative splicing of this gene results in transcript variants encoding either the same or different isoforms. Additional isoforms resulting from the use of alternate in-frame translation initiation sites have also been described, and shown to be functional, displaying diverse cytoplasm-to-nucleus trafficking patterns and distinct transcriptional activities (PMID:15866175).

**Application Notes:** Optimal working dilutions should be determined experimentally by the investigator. Suggested starting dilutions are as follows: WB (1:500-1:2000), IHC-P (1:100-1:300), ELISA (1:5000). Not yet tested in other applications.

**<u>Storage Buffer</u>**: PBS containing 50% Glycerol, 0.5% BSA and 0.02% Sodium Azide.

**Storage Instructions:** Stable for one year at -20°C from date of shipment. For maximum recovery of product, centrifuge the original vial after thawing and prior to removing the cap. Aliquot to avoid repeated freezing and thawing.

**Note:** The product listed herein is for research use only and is not intended for use in human or clinical diagnosis. Suggested applications of our products are not recommendations to use our products in violation of any patent or as a license. We cannot be responsible for patent infringements or other violations that may occur with the use of this product.
