

## Mindin Polyclonal Antibody

Cat #: ABP53471

Size: 30µl /100µl /200µl

### Product Information

	<b>Product Name:</b> Mindin Polyclonal Antibody		
	<b>Applications:</b> WB, ELISA		<b>Isotype:</b> Rabbit IgG
	<b>Reactivity:</b> Human, Mouse, Rat, Monkey		
<b>REF</b>	<b>Catalog Number:</b> ABP53471	<b>LOT</b>	<b>Lot Number:</b> Refer to product label
	<b>Formulation:</b> Liquid		<b>Concentration:</b> 1 mg/ml
	<b>Storage:</b> Store at -20°C. Avoid repeated freeze / thaw cycles.		<b>Note:</b> Contain sodium azide.

**Background:** Mindin, also known as Spondin-2 and DIL-1 (Differentially expressed in cancerous and non-cancerous lung cells 1) belongs to the F-spondin family of secreted extracellular matrix proteins. Family members are characterized by two N-terminal F-spondin domains (FS1 and FS2), and a third C-terminal thrombospondin type I repeat (TSP-1). Secreted Mindin exists as a disulfide-linked dimer that also forms higher order oligomers. It functions as a pattern recognition receptor for microbes and an adhesion molecule for neurons. Mindin is secreted by neurons, macrophages and fibroblasts in a variety of tissues. Human Mindin shares 88% amino acid sequence homology with mouse and rat proteins.

**Application Notes:** Optimal working dilutions should be determined experimentally by the investigator. Suggested starting dilutions are as follows: WB (1:500-1:2000), ELISA (1:40000). Not yet tested in other applications.

**Storage Buffer:** PBS containing 50% Glycerol, 0.5% BSA and 0.02% Sodium Azide.

**Storage Instructions:** Stable for one year at -20°C from date of shipment. For maximum recovery of product, centrifuge the original vial after thawing and prior to removing the cap. Aliquot to avoid repeated freezing and thawing.
