A similar protein in mice plays a role in craniofacial and rib cage development during embryogenesis. GSC (Goosecoid Homeobox) is a Protein Coding gene. Diseases associated with GSC include Short Stature, Auditory Canal Atresia, Mandibular Hypoplasia, Skeletal Abnormalities and Synostosis.

**Application Notes:** Optimal working dilutions should be determined experimentally by the investigator. Suggested starting dilutions are as follows: IHC-P (1:50-1:200), ELISA (1:10000-1:20000).

**Storage Buffer:** PBS, pH 7.4, containing 0.02% Sodium Azide as preservative and 50% Glycerol as stabilizer.

**Storage Instructions:** Stable for one year at -20°C from date of shipment. For maximum recovery of product, centrifuge the original vial after thawing and prior to removing the cap. Aliquot to avoid repeated freezing and thawing.
