

AbFluor™ 647 free acid

Cat #:BMD00021

Lot #: Refer to product label

AbFluor™ dyes are a series of highly water-soluble fluorescent dyes spanning the visible and near-infrared (IR) spectrum for labeling biomolecules, especially proteins and nucleic acids which are Developed by Abbkine scientists.

Product Information

Product name AbFluor™ 647 free acid

Specification

Fig. AbFluor™ 647 is a far-red fluorescent dye which is super alternative to Cy5, Alexa Fluor 647.

Product Properties

| | |
|-----------------------------|--|
| Storage instructions | Store at -20°C. The product can be stored for up to 6 months. Protect from light. |
| Shipping | Gel pack with blue ice. |
| Precautions | The product listed herein is for research use only and is not intended for use in human or clinical diagnosis. Suggested applications of our products are not recommendations to use our products in violation of any patent or as a license. We cannot be responsible for patent infringements or other violations that may occur with the use of this product. |

Additional Information

| | |
|-------------------|---|
| Background | AbFluor™ 647 free acid is a kind red-fluorescent dye. It can produce bright fluorescence. The most distinct feature of the AbFluor™ 647 free acid is its superior signal-to-noise ratio of combination of antibody in immune fluorescence reaction. At the same time, compared with Alexa Fluor 647, AbFluor™ 647 free acid has few charge, which will not affect the specificity of the antibodies combination. So it is an ideal fluorescent dye. |
