AbFluor™ 680 free acid

Cat #:BMD00027 Lot #: Refer to product label

AbFluor™ dyes are a series of highly water-soluble fluorescent dyes spanning the visible and near-infrared (IR) spectrum for labeling biomolecules, especially proteins and nucleic acids which are Developed by Abbkine scientists.

Product Information

Product name	AbFluor™ 680 free acid

Specification

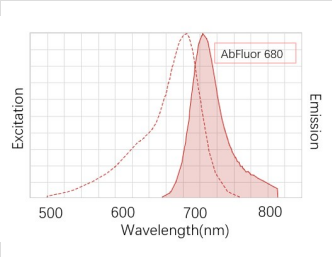

Fig. AbFluor™ 680 is an outstanding 680 nm-excitable dye which is super alternative to Cy5.5, Alexa Fluor 680.

Product Properties

Storage instructions	Store at -20°C. The product can be stored for up to 6 months. Protect from light.
Shipping	Gel pack with blue ice.
Precautions	The product listed herein is for research use only and is not intended for use in human or clinical diagnosis. Suggested applications of our products are not recommendations to use our products in violation of any patent or as a license. We cannot be responsible for patent infringements or other violations that may occur with the use of this product.

Additional Information

Background	AbFluor™ 680 free acid is an excellent near infrared fluorescent dye which can produce bright fluorescence, and has good light stability. It is the ideal dye for laser confocal and single molecular imaging.
Alternative names	Dylight 680
