## Hoechst 33258

Cat #:BMD00061

Lot #: Refer to product label

Hoechst dyes are cell membrane-permeant, minor groove-binding blue fluorescent DNA stains.

---

### Product Information

**Product name**                      Hoechst 33258

---

### Specification

Fig. Bright blue fluorescence of Hoechst 33258 staining glioma cells (C5 cell lines) nuclear.

---

### Product Properties

<b>Storage instructions</b>	Store at -20 °C and protect from light. Product is stable for at least 12 months from date of receipt if stored as recommended.
<b>Shipping</b>	Gel pack with blue ice.
<b>Precautions</b>	The product listed herein is for research use only and is not intended for use in human or clinical diagnosis. Suggested applications of our products are not recommendations to use our products in violation of any patent or as a license. We cannot be responsible for patent infringements or other violations that may occur with the use of this product.

---

### Additional Information

<b>Background</b>	Hoechst dyes are cell membrane-permeant, minor groove-binding blue fluorescent DNA stains. Hoechst dyes are widely used in cell cycle and apoptosis studies and also as nuclear counterstains.
