

Mouse IL13 protein

Cat #: PRP2114

Size: 5 µg/ 20 µg/100 µg/1 mg

Product Information

	Product Name: Mouse IL13 protein (Animal-Free)		
REF	Catalog Number:	LOT	Lot Number: Refer to product label
	Purity: >95% as determined by SDS-PAGE		
	Storage: Store at -20°C		Preparation method: HEK 293 Cells
	Shipping: The product is shipped at ambient temperature.		

Background: Interleukin (IL)-13, a cytokine produced by T helper 2 (Th2) cells, is a powerful inhibitor of macrophage functions, including surface expression of CD14 and production of IL-1 and tumor necrosis factor (TNF)-alpha. Interleukin (IL)-13 synergizes with IL2 in regulating interferon-gamma synthesis. It may be critical in regulating inflammatory and immune responses. Mouse IL13 shares 58% sequence identity with human protein and exhibits cross-species activity. IL-13 was first recognized for its effects on B cells and monocytes, where it upregulated class II expression, promoted IgE class switching and inhibited inflammatory cytokine production. It was also thought to be functionally redundant with IL-4.

Sequence: Amino acid sequence derived from mouse IL13 protein (P20109, Met1-Phe131) was expressed with a polyhistidine tag at the C-terminus.

Protein length: The recombinant mouse IL13 protein consists of 118 amino acids and predicts a molecular mass of 12.7 kD. The apparent molecular mass of the mouse IL13 is approximately 15-30 kDa in SDS-PAGE under reducing conditions due to glycosylation.

Biological Activity: Testing in progress.

Endotoxin: < 1 EU per µg of the protein as determined by the LAL method.

Formulation: 0.22 µm filtered protein solution is in PBS, pH7.4.

Storage Instructions: Lyophilized mouse IL13 protein product should be stored desiccated below -18°C. Upon reconstitution, the protein should be stored at 4°C between 2 -7 days and for future use below -18°C. For long term storage it is recommended to add a carrier protein (0.1% HSA or BSA). Please prevent freeze-thaw cycles.

Usage notes: Always centrifuge tubes before opening. It is recommended to reconstitute the lyophilized mouse IL-13 protein in the buffer which we provide not less than 100 µg/mL, which can then be further diluted to other aqueous solutions.

Note: The product listed herein is for research use only and is not intended for use in human or clinical diagnosis. Suggested applications of our products are not recommendations to use our products in violation of any patent or as a license. We cannot be responsible for patent infringements or other violations that may occur with the use of this product.
